PROJECTS

Nurture Plus — Early Parenting Web Application (Independent · Low-code/No-code · AI-assisted · 2026) Built a parenting support web app for parents of children aged 0–12 years, covering developmental milestones, health tracking, and curated resources. Developed independently using low-code/no-code platforms with AI-assisted workflows — from concept to deployment within 2–3 months.
Batchmates — University-Specific Peer Networking Platform (Independent · Low-code/No-code · AI-assisted · 2026) Designed and launched a multi-page web application enabling university-specific peer networking, allowing students to connect, interact, and collaborate within their institution. Built solo using low-code/no-code tools and AI — demonstrating rapid product development capabilities.
AgriPack — Biodegradable Packaging from Agricultural Waste (InnoMUN 2025 Winner · BITS Pilani) Developed a full go-to-market concept for converting pineapple-leaf agricultural waste into compostable packaging — addressing sustainability and circular economy challenges at scale.
Railway Concession Pass System — Centralised Database Prototype (2nd Runner-Up · We4Tech · 90 teams) Designed a centralised database prototype to digitise India's railway student concession pass workflow, eliminating manual inefficiencies across thousands of institutions.
